## PERSONAL PROJECTS

KeepCap : React Native

- the purpose of the KeepCap application is to Solve a problem to keep a note of cash exchange between individuals in the form of a loan, with timely reminders.
- This application keeps track of how much money you will pay and how much you will get back and then the total capital
- **Role and Key activities Performed** Coding, Unit Testing
- **Tools used** React Native, Firebase, Redux

IdeaHub : React.js

- The purpose of this project is to know all ideas. For this we submit our idea and all submitted ideas are showed in dashboard page and also hide and delete this idea.
- we can find an idea and will view particular idea details. we also analyze all an ideas in bar, pie and doughnut chart that implementing by chart.js.
- and lastly people can share their feedback and also contact for any queries.
- **Role and Key activities Performed** UI Design, coding, Unit Testing
- **Tools used** React, Sharepoint

WeatherApp : React.js

- This app will show Real time weather of your Current location and it will shows the Weather conditions of a particular city when you search the particular city.
- While making this app I uses React.js such as Hooks, States, Props, Components, effects, API Call, Dynamic data display, Dynamic fetch data, Working with forms, & for styling i use bootstrap library.
- **Tools used** React, Bootstrap
- **Project** : <https://github.com/krupalisavani99/live-weather-app>
